

*I say YES to*  
Elegant design with  
sophisticated details

#WATER**SMART**LIVING

The new HANSASTELE range  
The perfect combination of style and function

# It's the little details that count

---

At HANSA, our aim is to create faucets that are as stylish as they are functional. Where every feature and design element has been well thought out, from the sleek and striking aesthetics to the remarkable aerator that creates a “waterfall” effect. Details that have been refined through years of experience. For a level of sophistication that appears utterly effortless.

# Beauty that flows from within

Imagine a faucet that lets you experience water in all its glory. A faucet that brings out the beauty of water through its timeless and meticulous design.

## 360° design that leaves no surface untouched

In classic faucets the operating lever needs space to move, resulting in a visible and sometimes glaring gap. With our **HANSASTECLA** range we've made sure to keep all gaps to a minimum, for faucets where all movement is fluid and part of the overall design. So you can enjoy their beauty from any angle – no matter where you place them.

With a faucet that provides a fascinating diamond structured waterfall effect, let **HANSASTECLA** bring a touch of nature to your washbasin

It wouldn't be HANSA if we relied on looks alone: our innovative aerator is easy to remove and also to clean – meaning you'll never have to worry about a build-up of limescale

# Designed to fit your surroundings with ease

With HANSASTECLA, we've created a range of faucets as elegant and refined as you are. Faucets made to fit the design and layout of your bathroom with absolute precision, whether you have a freestanding basin sink, built-in solution or anything in between.

Top operated mixers in different styles

XL-Version for free-standing wash basin

Side operated version with smart center position lock for the swivel spout

## Traditional aerator – extra comfort

Use the adjustable aerator to ensure water flows into the basin without any splashing

### Ecology & Sustainability

- Touchless options – helping you cut water and energy consumption considerably
- Durable – designed to deliver long-lasting performance
- Sustainable – set flow rate of 6l/min

### Comfort, Hygiene and Safety

- Convenient – designed to fit multiple basin types and optimise all spaces
- Hygienic – minimal joints, smooth surfaces and touchless variants reduce formation of bacteria and make cleaning easy
- Safe – made with eco-friendly materials which preserve water quality

### Technology & Design

- Smart – Bluetooth\* functionality and multiple operation modes
- Stylish design which can be enjoyed from every angle
- Innovative – water flow designed to create a soothing effect

# A perfect balance of design and technology

Whether you experience HANSA**STELA** as a professional or as an end consumer, enter a new world of faucets – one where technology and design take their inspiration from nature.

## Great technology meets superb design

- Faucet that delivers a waterfall effect
- Adjustable aerator so you can match water flow to basin layout – and avoid splashing
- Extensive range available in a number of sizes
- Touchless functionality for optimal comfort, hygiene and long-term water and energy savings

## Use the app and enjoy the benefits of touchless technology

With infrared sensors designed to detect hand movement only, wave goodbye to excessive water and energy use – and enjoy a lifetime of savings

- Choose between three operating modes
- Set flow parameters
- Schedule automatic cleaning and flush mode (to remove stagnant water)
- Easily monitor water consumption

## Upgrade every project

- Wide range of faucets for a wide range of needs and desires
- Designed for residential and commercial settings
- Easy and quick installation of the versions with HANSA 3S-Installation system
- Enable remote operation via app of touchless bluetooth variants
- Touchless versions with mains or battery power supply
- Consistently reliable technology
